DETAILED ACTION

Allowable Subject Matter

1. Claims 3, 4, 14, 15, 25, 32, 46, 47, 57, and 58 are allowed.
2. The indicated allowability of claim 26 is withdrawn in view of the newly discovered reference(s) to Adams et al, US005664990A. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 26 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Adams et al, US005664990A . '990 discloses a planarizing machine, comprising a table having a support surface; a processing pad **11** on the support surface; a carrier assembly **21** having a head configured to hold a microelectronic work piece and a drive assembly carrying the head; and a solution dispenser having an elongated weir **38** over which a planarizing solution can flow. See figures 2 through 4. Given the broadness of the claimed invention, the examiner considers catch ring **23** to be part of the solution dispenser. Applicant may overcome this rejection by narrowing the claim to recite the structure of the solution dispenser.

Response to Arguments

5. Applicant's arguments with respect to claim 26 have been considered but are moot in view of the new ground(s) of rejection.
